

November Newsletter

Dear Little Explorers' Parents,

October was filled with lots of spooky fun! We spent the first three weeks of October focusing on habitats and nocturnal animals. The children enjoyed their first visit from Hamilton County Parks where we had an amazing hands on adventure with nocturnal animals. We spent the last two weeks learning about spiders and what makes them different from insects. Our visit from Mother Nature included a tarantula! The children are doing a fabulous job learning the phonics dance and working on their letter pages when they first get to school.

November is going to be a month filled with learning about different cultures and fall science. We will have our first visit from Crystal Clear Science who will lead us in some fun hands on science experiments. The Cincinnati Museum Center will visit and teach us about cultures from around the world. At the end of the month we will be creating some Native American inspired coil pots.

We want to wish you all a Happy Thanksgiving and we are thankful that we get to share our Mondays with your incredible children!

Sincerely,
Mrs. Amy and Mrs. Janean
