

October Newsletter

Dear Little Explorers' Parents,

We are off to a great year in Little Explorers! We are continuing to get to know each other and learn the rules of our classroom. We have also started our Phonics Dance. The children have done a great job and we are so proud of them!

In September we had a fun visit from Mother Nature who taught us all about reptiles and helped us learn the difference between reptiles and other animals. In our classroom we had a fun reptile sensory bin and even hatched our own reptiles!

In October we will start the month learning about animal habitats and nocturnal animals. We will have a visit from Hamilton County Parks who will teach us all about nocturnal animals. We will spend the last two weeks learning about spiders and have a visit from Mother Nature who will teach us some songs and fun facts about spiders. We will end the month with some fun Halloween games and crafts!

Thank you for sharing your children with us,

Mrs. Amy and Mrs. Janean
