

December STEAM

Ms. Windy and Ms. Jess

Dear STEAM Families,

November was another great month in our STEAM classroom! Our students worked hard on sequencing, patterning and coding. They investigated and learned more about themselves, explored STEAM concepts in a favorite fairy tale, *Goldilocks and the Three Bears* and participated in the STEAM Olympics.

Congratulations to our November STEAMer of the Week Students: Lillyan, Emma and Chloe! We loved what they shared with the class!

In our last class before Christmas break, we will spend some time in Santa's Science Workshop exploring fun holiday themed science experiments and ending the day with a challenge to build an elf trap to help Santa find a runaway elf.

We are inviting parents or special guests to come back early at 12:40pm for some hot cocoa and fellowship to celebrate the Christmas season with our STEAM students. During this time, students will share their elf traps with family and classmates.

We hope that you all have a Merry Christmas and wonderful holiday break with your young STEAMer!
