

# February Newsletter

**Dear Little Explorers' Parents,**

We had a great time learning about the ocean and coral reefs during the month of January. Our visit from The Cincinnati Museum Center was so exciting and the kids had so much fun “swimming” through the coral reef with their favorite sea creatures! We also finished our octopus art project that will be featured in the April Art Show!

In February we will spend the first two weeks learning about our five senses and how they are different from animal senses. Hamilton County Parks will be bringing in some animal friends with unique senses.

The last Monday in February we will spend the class playing with Legos! We will be making Lego art, building a Lego giraffe and we will also have a Lego STEM challenge at our Science Table!

We hope you have a Happy Valentine’s Day and just remember that we do not have class on February 18th.

Sincerely,

Mrs. Amy & Mrs. Janean
