

# March STEAM

Ms. Windy and Ms. Jess

Dear STEAM Families,

February was another great month in our STEAM classroom! Our students learned how to make a hypothesis and test it out to learn if they were correct, constructed model and paper planes and rescued Rapunzel from her tower and created a special piece of artwork for the art show.

Congratulations to our February STEAMer of the Week Students: Julia and Miles! The class loved the apple volcano and fossil activity! Thank you families for allowing your students to share that with us!

Don't forget that we do not have class on March 29th because of Spring Break-- we hope for good, warm

In March we will explore rainbows and color mixing, continue to learn basic coding, build leprechaun traps and end the month with a fun STEAM Spring Olympics with events and activities to celebrate the upcoming Easter holiday.

weather and a wonderful spring break for you and your young STEAMer!

We are so thankful to have such wonderful students!
