

April STEAM

Ms. Windy and Ms. Jess

Dear STEAM Families,

March flew by in our STEAM classroom! Our students explored colors and created rainbows, we learned more about coding and practiced it by playing many new coding games, and we celebrated St. Patrick's Day by building Leprechaun traps and headed into Spring with eggstraspecial STEAM activities.

Congratulations to our March STEAMer of the Week Students: Emilia and Archie! The class loved learning about fossils from Emilia and seeing Archie's cloud experiment! Thank you families for allowing your children to share that with us!

In April we will be learning about gadgets and gizmos, finding STEAM in the fairy tale The Three Little Pigs, and learning about kinetic energy. As we enter our last few weeks of class we will continue with our STEAMer of the week. We look forward to seeing presentations from Graham Noble, Lila Jones and Ryan Stilphen.

Wee Three Kings will have their Annual Art Show Thursday, April 18th at the Oasis. This is a fun evening for everyone. The kids are always so proud of their artwork, and we are so proud of them! We hope to see you all there!

We are looking forward to finishing the year with a lot of fun and learning with your young STEAM students. Thank you for sharing your wonderful children with us!

Ms. Windy and Ms. Jess
