

November Newsletter

Dear Little Explorers' Parents,

October was filled with lots of spooky fun! We spent the first three weeks of October focusing on reptiles. The children enjoyed their first visit from Mother Nature where we had an amazing hands on adventure with a bearded dragon. This month the children also all hatched their mystery reptile from an egg. We spent the last week doing some hands on Halloween science. The children are doing a fabulous job learning the phonics dance and working on their letter pages when they first get to school.

November is going to be a month filled with learning about nocturnal animals, Thanksgiving and fall science. We will have our first visit from Hamilton County Parks who will be doing a presentation on nocturnal animals. The week of Thanksgiving we will be creating some Native American inspired coil pots.

We want to wish you all a Happy Thanksgiving and we are thankful that we get to share our Mondays with your incredible children!

Sincerely,

Mrs. Friday and Mrs. Dicari
