

March Newsletter

Dear Little Explorers' Parents,

Wow! We really did use all of our five senses in the month of February! Our jellybean tasting was a lot of fun. The popcorn flavored jelly bean got mixed reviews and the cherry jelly bean was the overall favorite. We also learned that our senses are both similar and different from animal senses. Hamilton County Parks taught us that snakes use their tongues to smell! We had some incredible animal encounters while learning about animals and their animal senses.

We ended the month with our "Pet Party." The children loved making collars for their pets, and we all enjoyed eating dog biscuits for snack!

We will spend the month of March learning all about dinosaurs. We have two incredible dinosaur presentations with the Cincinnati Museum Center and Mother Nature. We will also spend some class time making dinosaur fossils and doing some fun dino art!

We will end the month learning all about colors and how we can mix colors to make new colors.

Don't forget that we go outside if it is 32 degrees or above. Please pack hats, gloves and a warm coat!

Sincerely,

Amy & Janean
