

## April Newsletter

We had a great month of March with lots of fun experiments. Our class favorite was making a rollercoaster. The children thoroughly enjoyed it and worked very well together in teams. I hope some of your children showed you how to light up a light bulb using just their hair. This was a great way to show them how energy is transferred!

Our STEAMERS of the Week brought in some great things to share and I look forward to seeing what the next round brings!

Most of the students have been working on the chrome books and have had a turn using the digital camera. We will continue to use these forms of technology throughout the rest of the year. Our 3D printer is up and running and hopefully they will bring something home to show you soon.

April will see us eating and planting seeds, talking about the Three Little Pigs fairy tale, colour mixing and making our own multi colored crayon. At the end of the month we will be conducting experiments with water and bubbles, so we may get wet at times! We will also make "oobleck" - I will let them tell you about that!

If you haven't signed up for STEAMER of the Week yet, there are still a couple of slots available.

As always don't hesitate to contact me with any questions
