

Hello STEAM families! Our class is off to a great start and running FULL STEAM ahead this month. In September we focused on getting to know one another and meeting new friends. Mrs. Liu and I were able to challenge our students with three STEAM Challenges - Build a Monster four blocks high, Build an Apple Tree that could balance ten apples and Build a Wall using support. We learned an important lesson that if our challenges don't work the first time, we always TRY AGAIN (and sometimes again and again). We are so proud of our students' perseverance.

During the month of October we will:

- Design a face
- Explore magnetic force
- Build a bridge to withstand weight
- Explore pumpkins

We are anxiously awaiting the arrival of our car kits, which we planned to build last month, however they have yet to arrive. As soon as they arrive we will shift our schedule because building cars and racing them always brings lots of excitement.

If you have not downloaded the GroupMe App, attached is the invitation. You will be able to view class pictures and important last minute notes and reminders.

Thank you for sharing your little ones with us!

Fondly,
Ms. Boldizar
