

OCTOBER NEWSLETTER

We have had a great first few weeks of STEAM and getting to know the class and the new routine. We've had a lot of fun with weekly themes and I hope they have come home talking about everything they have learned.

We will start October with an "All About Me" class and then have "Fabulous Faces." On October 8th, we will have a visitor from Mothers Nature program and she will be doing an "All About Me & Body" presentation. To complement this we will be making a paper mache head!

We will carry on with another fairy tale class with Goldilocks and the Three Bears. In our third week, we will be doing our first coding class. A lot of what we do in our day to day lives involves coding... and we will revisit this theme again in the spring. Hopefully we will be able to code our 3D printer and start to build and code a robot!

We finish the month off with "Oh My Gourdness it's Pumpkins." We will do lots of counting and measuring and begin a year long experiment with a rotting pumpkin!
