

Dear 3's STEAMer Families,

We had a fun month in November! It feels like we are in good routine and I really enjoy getting to know the kids more with each class! By the end of the class, the kids seem to be very excited/ready to see their grownup.

Therefore, dismissal goes by pretty quickly! Please use this email and the photos/summary posted on the GroupMe app to get an update of the day's activities. Of course, if you have any questions do not hesitate to let me know. :)

December will be a quick month for us with just 2 classes together before the break. I know they will be full of fun and am already looking forward to the festivities planned!

December 3 Experiment: Snow and Ice

We will embrace the season of winter this week with some snow and ice activities. We will experiment with what melts ice more quickly (salt or sugar), talk about the water cycle, build a hexagon snowflake using pattern blocks, have a snowball toss, and read a few snowy stories! This class will prove how much more fun snow is with kids!

December 10 Engineering: Build a Christmas Tree

Ho Ho Ho! Our challenge this week will be to create a sleigh for Santa! We will also use play dough to make "cookies" for Christmas, make candy cane patterns, use triangles to make and decorate a tree, and listen to music and sing songs to put us even more in the holiday spirit!

We hope you all had a Happy Thanksgiving and enjoyed spending time with family and friends. We also look forward to our festive classes in December and will see you next month!

Mrs. Carlberg and Mrs. Jacobs
