

Dear Little STEAMer Families,

We had a great month of March with lots of fun experiments and enjoyed getting outside as much as the weather permitted! Looking forward, this month we will focus on concepts related to spring. Hopefully, the weather will cooperate so we can continue to enjoy the nature around us! We will learn about plants, eggs, bugs, and bubbles. :)

April Classes:

(4/8) **Plants** - We will learn about and discuss how plants and flowers grow. We will take a closer look at the different parts of a plant. The kids will also plant seeds so they can observe this process first hand!

(4/15) **Humpty Dumpty** - Our challenge this week is to build a wall that will be safe for Humpty to sit on. We will also predict and experiment with types of protection for Humpty if he does fall. Children will make their own Humpty Dumpty to take home.

(4/22) **Bugs** - Bugs don't bother us! We will talk about all things bugs this week and learn about why these small creatures can actually be very helpful to us. Our challenge will be to design a bug using loose parts and we will make some pretty cool buggy artwork, too!

(4/29) **Bubbles** - Who doesn't love bubbles?! For our last week in April we will embrace this soapy water while designing a bubble wand, creating bubble art, and even experimenting with a bubble lava lamp. This concept will surely be appealing to all the kids' hearts!

We hope you all had an enjoyable Spring Break and look forward to seeing you in April!

Sincerely,
Katelyn Carlberg and Amy Jacobs
