

Hello STEAM families! We are off to an AMAZING start. We have settled into a STEAM routine and the children have transitioned so well. Mrs. Shaw and I were able to challenge our students with four STEAM Challenges - build a monster, build an apple tree with ten apples on top, build sturdy structures to withstand wind, and build a structure to hold pumpkins. We learned an important lesson that if our challenges don't work the first time, we always TRY AGAIN (and sometimes again and again). We are so proud of our students' perseverance.

During the month of October we will:

- Design a body
- Design our family
- Build a fort
- Learn about magnetic force

Thank you for sharing your little ones with us. Be sure to read the weekly recap on GroupMe so you can ask your children what we learned. We hope you enjoy the pictures we post!

Fondly,
Ms. Boldizar
