

## **Pre K STEAM NOVEMBER NEWSLETTER**

**October was a very busy month for our STEAMERS. We learned about ourselves and how our bodies work from the Mothers Nature program. We learned about bridges and had fun building one for the three Billy goats. We finished the month by starting our year-long pumpkin project. We have put a pie pumpkin in a sealed container and will see what happens to it over the school year. If you look at GroupMe you'll see a pumpkin we grew from last year! We also found iron in breakfast cereal using magnets!**

**This month we will spend 2 weeks learning about coding and how it is used in a lot of our day to day activities. We will code a mouse across a track and use the iPad for some coding games. Our last week will be about balloons, focusing on the Thanksgiving Day parade and trying to recreate our own. We will do some fun science experiments with balloons.**

**Wishing you a wonderful Thanksgiving break 🍁**

**Ms. Jess and Ms. Lisa**
