

PRE K STEAM MARCH NEWSLETTER

February flew by, with a visit from Mothers nature and learning to reduce, reuse and recycle. We made planes and learnt how they fly and tested them out to see which ones went the furthest. We recycled broken crayons to make new multi coloured ones and we had 4 more STEAMERS OF THE WEEK but I think the highlight of the month was making bread!

In March we will revisit simple machines and try to make a life size cart or pulley.

We will have March madness with a lot of fun revisiting some of our favorite experiments and trying some new ones. More madness will follow as we have class on St Patrick's day, we will make a leprechaun trap and see if we can catch him 🍀 Mothers nature will then come back and visit and talk to us about dinosaurs, we will start our big art show project which is what we've been saving our cardboard tubes for, and make our very own dinosaur fossil, we also have some geodes we will crack open. We've been talking about these for weeks and counting down the classes till it's "Geode week"! Our last class this month is all about the seeds we eat. We will try lots of different foods and see which ones have edible seeds. We will be making our very own terrariums (it's what we've been collecting the plastic tubs for)and checking in on pumpkin Jack and hopefully planting some sprouts!

Roll on spring!

Ms. Jess and Ms. Lisa
