

PRE K STEAM NEWSLETTER APRIL 2023

March was such a busy month. We made so many things and did some fun experiments - oil and water mixing, breaking open geodes, making oobleck and I hope one that lasts a long time building our own terrariums. We were also blessed with another visit from Mothers Nature with her dinosaur program. We worked in groups and made some big dinosaurs which will be on display at the art show.

We still have a lot to pack into the last few weeks of STEAM. We will start off with making a diorama of our solar system and hopefully get to look at the sun with a big telescope, then we will work on a paper mache model of the earth which we will finish in time for Earth day. We will finish the month with a shape scavenger hunt around the school and recap some of our favorite activities that we have done this year. If there is something that your child

hasn't stopped talking about let me know so we can revisit it!

We will have our very own art show day this year, mark your calendars for Friday 21st at 12.00. Please come to the classroom to collect your child, then you can visit us in the classroom where we will have some things on display and then visit the main art show in the muscle room.

Hope you all had a wonderful Easter 🐣

Ms.Jess and Ms. Lisa
