

Pre K Steam Newsletter May 2023

What a great month April was. We spent a lot of time talking about how big space is and the planets in our solar system. Our diorama turned out amazing, as did our paper mache Earths we made to celebrate Earth day.

Thank you for coming to our art show, I hope you enjoyed seeing some of the activities that we do that they don't get to bring home.

We only have 2 classes in May, but they will be fun filled.

Our first week will be all about water and bubbles and we have several experiments that we will try out, let's hope for warm weather! We will make a boat and make sure it floats which is not always easy to get the right balance.

We will try catching bubble with our hands and see how long one can last.

The last week will be THE GREAT EGGSTRAVAGANZA. Everything we do will be about eggs. We will do several experiments, the one they love most is where we try to stand on a box of eggs and see if they crack or not!

We will check on our rubber egg and see how high we can make it bounce. Weather permitting we will hopefully do some egg and spoon races.

We will finish the day off with the classic egg drop which is always a lot of fun.

We will also make our own ice cream! For those with allergies I will talk to you nearer the time to make sure they can also make their own with some adjustments.

Those with egg allergies - they will only be touching the eggs, if that is a problem please let me know.

Here's to a great last two weeks! 🌊 🥚 🧴 🧼

Ms. Jess and Ms. Lisa
